Show What You Know® Publishing expands test-preparation line nationally with Common Core Workbooks

Columbus, OH — March 16, 2011 — Show What You Know® Publishing, a division of Englefield & Associates, Inc., is expanding its line of state test-preparation materials and creating national Common Core State Standard (CCSS) diagnostic assessment workbooks for students nationwide in grades 3–8.

Show What You Know® on the Common Core diagnostic workbooks will assess students' proficiency with the CCSS by tracking students' strengths and weaknesses on two full-length assessments for reading and mathematics, featuring questions aligned to the CCSS. In addition, the new series will provide chapters on test anxiety, test-taking strategies, and glossaries of terms for reading and mathematics to help prepare students with the knowledge and skills they need to succeed in school and in life.

"As states are phasing out of old state tests and into new tests assessing the Common Core State Standards, our new editions will help bridge the gap," said Cindi Englefield, president of Englefield & Associates, Inc. "We want to continue to prepare students for any test they face today, and since so many states have adopted the Common Core State Standards, we see an increased need to help students reduce their test anxiety and become better test takers."

About Show What You Know® Publishing

For nearly two decades, Show What You Know® Publishing, a division of Englefield & Associates, Inc., has provided K–12 educators with solutions to prepare students for their state assessments. From its beginnings as a professional development provider to its current position as a leading publisher of supplemental materials, Show What You Know® Publishing, has integrated psychology into the best practices of test preparation to create powerful tools that help students achieve their best on state assessments.

About the Common Core State Standards

The Common Core State Standards (CCSS) were created under the leadership of the National Governors Association (NGA) and the Council of Chief State School Officers (CCSSO). To date, 42 states, one territory, and the District of Columbia have adopted the CCSS, pledging to integrate them into their state assessment standards. The CCSS were designed to provide uniformity and high standards for student achievement in grades K–12 across the nation.
